While treating erectile dysfunction in a patient by administering a therapeutic amount of a drug such as sildenafil is well known in the art, the novelty here lies in the formation of condensate aerosol particles, especially with an MMAD of less than 5 microns, at a degradation rate of less than 10% and wherein peak plasma is reached in less than 0.1 hours.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
